05/20/2008:

## Marshall Diesel Tractors 1930-1957 - forthcoming book

Peter Anderson's book, prepared with the help of the late Jeff Bloom, is aimed at owners, restorers and potential buyers of Marshall tractors. Peter deals with the following models: the 'Colonial'; Model E (15/30); 18/30; 12/20 and M; Field Marshall Mark 1 and Series 2, 3 and 3A; MP4 and MP6; the Track Marshall; the Fowler VF and VFA and the Gainsborough loading shovel. The book includes 280 photographs.

Peter gives a potted history of the development of each individual Series and Mark. Wherever possible he offers current or potential owners a Buyer's Guide for each model. This describes areas of likely wear and tear or specific checks to be made before purchase.

At the end of each chapter Peter gives a specification sheet with details of general dimensions, capacities, optional equipment, production numbers and areas of distribution. He completes the book with chapters on preventative maintenance and trouble-shooting. Restorers are well served by Peter's knowledgeable discussion of what might or might not be counted as authentic.

Peter shares with the late Jeff Bloom a deep-rooted enthusiasm for Marshall. He is author of *Three Decades of Marshall Tractors* and numerous articles

about the company and its products.

**Marshall Diesel Tractors 1930-1957** by Peter Anderson, hardback book, approx 220 pages inc. 280 photographs. ISBN 978-1-905523-88-7. £24.95, September, Old Pond Publishing.
